

Vaccines

While you are likely to have had the routine vaccinations and childhood immunizations needed to live in NZ, some may need updating before you travel. These may include:

- Chicken Pox
- Diphtheria
- Flu Vaccine
- Hepatitis A
- Hepatitis B
- Measles
- Mumps
- Pneumonia
- Rubella
- Tetanus
- Typhoid
- Whooping Cough

In addition, there may be other specialized travel vaccines you will need to protect yourself before going to the Pacific, Asia, Africa, the Middle East or South America, such as:

- Cholera
- Hepatitis A + B
- Japanese Encephalitis
- Malaria
- Meningitis
- Polio
- Rabies
- Tetanus
- Travellers Diarrhoea
- Typhoid
- Yellow Fever
